

MEDICAL IMAGING DURING YOUR HOSPITAL STAY

.....

During your stay in hospital you may need to have medical imaging undertaken to provide your treating doctor with a diagnosis or to monitor your progress.

If this is the case, you will receive a separate account from Queensland X-Ray. This is because we are a private and separate entity to the hospital.

It is important to note that Medicare and/or your private health insurer may not cover private radiology costs for imaging required during your hospital stay and you may incur an out-of-pocket cost. We strongly recommend that you contact your private health insurer prior to your admittance to hospital to enquire whether medical imaging services will be covered under your plan.

If you would like to receive more information on our fees prior to admission, please contact us at **inpatientenquiries@qldxray.com.au**

Further information about our billing policies, please scan here or visit qldxray.com.au/patients/billing-information
